Thanks for purchasing the GameDev Market RPG Humble Bundle!

Not only do you now have access to a huge collection of high quality, game ready assets, but by purchasing the bundle, you're also helping to raise money for a great cause for the Humble Bundle charity of choice.

IMPORTANT BITS!

Licensing

Before you jump in and get going with all of the assets included in the bundle, we just need to make you aware of the licensing terms for using the assets.

Each asset that comes in the bundle is mainly covered by GameDev Markets standard license terms, with one vital difference. At the moment our license states that each asset can only be used in one project, however we are in the process of removing this clause, so for the purpose of any Humble Bundle purchases, all assets can be used in multiple projects.

You can find the full terms here - **https://www.gamedevmarket.net/terms-conditions/#pro-licence**

Please ensure that you read the license terms in full so you understand what you can and can't do with the assets.

Support

You shouldn't have any problems accessing or using any of the assets within the bundle, but if you do need any help at all you can either;

- contact the asset creator directly if there is a problem or question with a specific asset and they have included contact details within their asset zip folder
- if they haven't provided any contact details or if it is more of a general problem/query, just fire us over an email to support@gamedevmarket.net and a member of the team will help you out.

We'll do our best to respond to any support tickets within 24 hours, but due to the high number of users purchasing the bundle, this may take a little longer initially.

Good luck with your game projects and don't forget to check out the rest of the assets available on GameDev Market!
